

HealthiStraw™

Our dust-free HealthiStraw™ animal bedding is high-quality 100% wheat straw, sourced throughout the Canadian prairies. It is available in different lengths, allowing you to customize your animal bedding.

ABSORBENT

HealthiStraw™ is significantly more absorbent than raw straw and comparable to other leading bedding products.

BIOSECURITY

HealthiStraw™ is sourced from clean wheat fields and is protected from contamination before and after production in our biosecure facility.

ANIMAL HEALTH

HealthiStraw™ reduces animal exposure to harmful dust, mold, salmonella and other pathogenic organisms, improving animal health and comfort.

MORE COVERAGE

HealthiStraw™ has more bedding than a standard bag of wood shavings, but at a similar price.

CONVENIENCE

HealthiStraw™ is easy to lift, carry, and spread out.

COMPOSTABLE

HealthiStraw™ forms a complete biological cycle that takes 100% wheat straw from grain crops and returns the used straw back to the soil as an excellent compost and organic enhancer.

ODOR REDUCTION

HealthiStraw™ reduces barn odor by trapping ammonia gases in the layers of straw.

EMPLOYEE WELLNESS

Employees no longer have to breathe in the dust and mold that comes from working with regular straw bales or wood shavings.

RELIABLE SUPPLY

Animal bedding is our business, not a by-product or an afterthought. As a result, HealthiStraw™ is available on-time, when you need it.
